Experience

Founding Engineer @ India Genius Challenge

Remote | May 2025 - Currently Working

- Scaled platform from **0 → 40K users** in 4 months; supports **10K+ weekly users** and **100000+ quiz attempts**
- Built dynamic quiz engine with **10k+ questions** delivering unique daily sets; **increased engagement by ~35%**
- Designed ELO ranking system for 40K users; **reduced database load by ~60%** with daily computation
- Built WhatsApp CLM reaching 10K users per day; **reduced re-engagement cost by ~40%**

Technical Lead @ WebVeda

Remote | March 2024 - Currently Working

- Architected and deployed a robust checkout and payment infrastructure leveraging Razorpay and Stripe, facilitating **10K+ transactions monthly**.
- Independently built the payment and checkout flow for a company-wide platform relaunch (WebVeda 2.0) that shipped with virtually **zero downtime**.
- **Orchestrated the end-to-end automation of WhatsApp messaging** for live classes, seamlessly **managing 10K+ messages per month** and mitigating manual intervention by 80%.
- Led **migration prep for 500,000 user** records and completed all new subscription-platform integrations, while scaling the engineering team 3x for relaunch.

Student Intern @ IBM

Remote | December 2020 – January 2021

- Gained hands-on experience with Machine Learning and Artificial Intelligence, exploring their real-world applications.
- Developed the 'Traffix' Project, utilizing traffic simulation and Google Teachable Machine to analyze and predict traffic patterns.
- Curated and prepared datasets for training ML models, strengthening foundational data science skills.
